David Quispe

Systems Engineer ▪ AI Engineering & Cybersecurity

davidq@personaxis.com ▪ Cusco, Peru (Open to Remote / Relocation) ▪ davidquicast.github.io

github.com/davidquicast ▪ huggingface.co/davidquicast ▪ linkedin.com/in/davidquicast

PROFESSIONAL SUMMARY

Systems Engineer with professional experience building AI applications, fine-tuning open-source models, and supporting enterprise cybersecurity operations. Practical background includes developing Retrieval-Augmented Generation (RAG) pipelines, tool-calling agentic workflows, and implementing vulnerability intelligence and organizational security controls (NIST CSF, ENS, ISO 27001).

TECHNICAL SKILLS

AI & Machine Learning: PyTorch, Hugging Face, Transformers, PEFT (LoRA/QLoRA), RAG, LangChain, Langroid, smolagents, Vector Databases (Qdrant, FAISS), Model Quantization, Synthetic Data Generation.

Cybersecurity & Cloud: Vulnerability Intelligence, Threat Intelligence (CTI), EDR Platforms, Fortinet, Microsoft 365 Defender, CCN-CERT Tools, Zero Trust Architecture.

Engineering & Systems: Python, FastAPI, Docker, SQL (PostgreSQL, MySQL), Git, Linux/Bash, React, Laravel.

Standards & Frameworks: NIST CSF, ENS (Esquema Nacional de Seguridad), MITRE ATT&CK, OWASP Top 10, STRIDE, ISO 27001.

Languages: Spanish (Native), English (C1 Professional Working Proficiency).

PROFESSIONAL EXPERIENCE

FIAP – International and Ibero-American Foundation for Public Policy Sep 2024 – Jun 2025

Cybersecurity Technician Madrid, Spain (Hybrid)

- Spearheaded an internal vulnerability intelligence program across organizational assets to proactively detect, catalog, and prioritize remediation of critical CVEs.
- Developed cyber threat intelligence (CTI) proof-of-concept workflows leveraging open-source LLMs and Microsoft Copilot to automate alert triaging and IOC correlation.
- Coordinated asset inventory, security audits, and threat detection utilizing enterprise EDR and CCN-CERT security solutions.
- Configured and hardened Fortinet firewalls and Microsoft 365 security controls, authoring organizational security policies aligned with Spanish National Security Framework (ENS) and NIST standards.

PlawLabs Ltd. Jul 2024 – Sep 2024

AI/ML Engineer London, UK (Remote)

- Fine-tuned open-source foundation models (LLaMA-3.1 8B and 70B) utilizing parameter-efficient fine-tuning (PEFT/QLoRA) and 4-bit quantization, merging adapter checkpoints for optimized production inference.
- Architected and deployed an end-to-end Retrieval-Augmented Generation (RAG) system with dense vector embeddings and vector databases, enhancing factual grounding for domain queries.
- Built and benchmarked autonomous tool-calling agents using LangChain and Langroid; evaluated latency, cost, and reasoning accuracy between open-weight and proprietary models.

HAMB Ingeniería y Construcción S.A.C. Jan 2022 – Sep 2022

Full Stack Web Developer (Internship) Cusco, Peru (On-site)

- Led full-stack web application development with Laravel, React, and MySQL, delivering feature enhancements that contributed to a 25% increase in the active customer base.
- Designed and integrated SAP inventory management workflows, reducing inventory process inefficiencies by 30%.
- Rolled out enterprise CRM software and trained technical and sales teams, increasing staff productivity by 20%.

RESEARCH PUBLICATIONS & OPEN SOURCE

INCLUDE-2.0: Disentangling Knowledge Gaps in Multilingual LLM Evaluation EMNLP, Oct 2026

Coauthor (David Quispe-Castillo). *Proceedings of the 2026 Conference on Empirical Methods in Natural Language Processing (Main Conference)*. Evaluated knowledge boundaries across multilingual LLMs, analyzing linguistic gaps in standardized benchmarks.

CulturalRiddles: A Multicultural Benchmark of Riddles arXiv:2610.29968, Oct 2026

Coauthor & Lead Spanish (Peru) Contributor (Cohere Labs Community collaboration). Contributed culturally grounded evaluation instances and dialectal validation pipelines for Latin American NLP benchmarking.

Open Source AI Contributions & Model Citations

- **Google DeepMind Gemma Recipes:** Contributed and merged fine-tuning recipe and configuration for Gemma models (github.com/google-gemini/gemma-cookbook).
- **Hugging Face Smol Course:** Authored and translated Spanish LLM reasoning, alignment, and agent notebooks (github.com/huggingface/smol-course).
- **Argilla Synthetic Data Generator:** Implemented Docker and local Ollama inference integration for private offline synthetic data workflows (github.com/argilla-io/synthetic-data-generator).
- **Cited Language Benchmarks:** Authored Spanish datasets *KUNTUR* and *WikiHowES*, cited by #Somos600M (Jul 2024) and RigoChat 2 (Mar 2025).

SELECTED PROJECTS

Personaxis + persona.md 2026

Open specification and command-line toolchain for declarative AI agent personas: schema validation, compiler targets, linting, AST diffing, alongside an open agent persona registry.

Open Deep Research for Vulnerability Intelligence 2025

Autonomous cybersecurity research agent utilizing `smolagents` and LangChain to automate threat aggregation across NIST NVD, Shodan CVEDB, KEVin, and EPSS APIs.

Sorry-Bench Multilingual Translation Pipeline Cohere Labs Collaboration, 2025

Automated translation and validation pipeline releasing a multilingual safety evaluation dataset on Hugging Face to benchmark LLM jailbreak resistance across diverse languages.

EDUCATION

DIGITECH – Technology and Digitization Center Madrid, Spain | Sep 2023 – Jun 2025

Dual Higher Degree in Network Computer Systems Administration (ASIR)

CEUPE – European Center of Postgraduate Studies and Business Madrid, Spain | Mar 2022 – May 2023

Master in Cybersecurity

Universidad Mayor Santiago, Chile | Apr 2023 – Nov 2023

Postgraduate Diploma in Cybersecurity

Andean University of Cusco Cusco, Peru | Jan 2017 – Nov 2022

Bachelor's Degree in Systems Engineering

CERTIFICATIONS & SPECIALIZED TRAINING

Professional Certifications:

- **Expert in Transformer Models and Deep Learning for NLP** – LenguajeNatural.AI (Aug 2024)
- **Internal Auditor ISO/IEC 27001 (ISMS) & ISO 22301 (BCMS)** – TÜV NORD (Mar 2023)
- **Expert in Information and Security Systems** – European Postgraduate and Business Studies (Mar 2023)
- **Cloud Security Technician** – Carlos Slim Foundation (Oct 2022)

Specialized Industry Training:

- **Building RAG Agents with LLMs** – NVIDIA Deep Learning Institute (Apr 2025)
- **The Reasoning Course & AI Agents Fundamentals** – Hugging Face (Feb – Apr 2025)
- **CyberOps Associate & Endpoint Security** – Cisco Networking Academy (Jul – Oct 2023)
- **Computer Forensics, Ethical Hacking & Information Security** – National Forensic Investigation Institute of Peru (Feb – Apr 2023)
